Profile

I am an information technology undergraduate student recently graduated with a first-class honour skilled in software and website design, debugging, and tests. I am a strong player who can quickly learn and apply new technologies. I am looking to get into the world of software development utilizing my skills and knowledge.

Education

UNIVERSITY OF BEDFORDSHIRE | LUTON, UK

JUNE 2022 – JUNE 2023

MSc Software Engineering and Applications

Key Modules: Distributed and Parallel Computing Technologies, Applied Software Development Techniques, and Applications of Open-Source Frameworks.

UNIVERSITY OF BEDFORDSHIRE | LUTON, UK

FEB 2019 – FEB 2022

BSc Information Technology

Grade: First Class

Key Modules: Introduction to Software Development, User Experience Design, Fundamentals of Computer Science Studies, System Development and Modern Database Practices, Web Technologies, and Platforms.

Final Year Project: “E-Doctor Cross platform online doctor consultation app”. Created a cross platform mobile application using React Native in the frontend and Firebase in the backend. This app lets users search hospitals and doctors, book doctors’ online appointments and get doctors consultation through messaging feature of the app.

Experience

HUMANITARIAN OPERATION | LONDON, UK

FEB 2022 - PRESENT

Frontend Developer (Part-time volunteering internship)

- Build a single-page company’s internal web application using React JS, HTML, and CSS.
- Create routes for the website using React Router Dom.
- Create dynamically generated tables and forms on multiple pages and fill them with data by requesting them from the company’s API using HTTP request GET.
- Implement other HTTP requests like POST, PUT and DELETE for the forms and tables.
- Set up filtering and searching data features in tables and pages.
- Create reusable components for the website pages like buttons, dropdowns, inputs, forms, and tables using React Bootstrap framework and CSS.

- Improve scalability of front-end elements by optimizing them for loading speed and performance.
- Assisting in the training of new frontend developers
- Manually test all functionality and components of pages before pushing through GitHub for the testing team to test.
- Collaborate with team members and other departments such as backend, graphic designers, and DevOps in an agile environment to implement or improve features on the website.

ICELAND FOODS | LUTON, UK

SEP 20190 - FEB 2022

Retail Assistant (Part-time)

- Interaction with customers.
- Assisted as a part of a team in a variety of situations.
- Problem-solving and time-sensitive critical thinking.
- Handling and counting cash, serving customers, and processing transactions.
- Stock management to ensure the shop floor is continually stocked.
- Managing deliveries when they arrive.

Skills & Abilities

- | | |
|----------------|------------------------|
| • HTML and CSS | • Communication skills |
| • JavaScript | • React Redux |
| • React JS | • Node JS (Express JS) |
| | • TypeScript(learning) |

Achievements

- Participated in a 2-day hackathon in the university where I had developed a web chat system using NodeJS, HTML and CSS. This app lets the user create a chat room where other users can join and message using the room's id.

Online Courses

I have done following online courses on Udemy

- Complete JavaScript course 2021
- The complete react native + hooks course
- The complete Node JS Developer course
- React JS complete course 2021
